

Negative impacts of global radicalism

On April 5, students at the institute were given detailed information about the essence of radicalism, missionaryism and proselytizing affecting the minds of young people. The event was attended by representatives of the Russian Orthodox Church Shkivorodiyuk Oleg Stepanovich and Professor of the International Islamic Academy of Uzbekistan, Doctor of Psychology Umarov Bakhridin Mengboevich.

Missionaryism is a stream that aims to increase the number of supporters in the community by promoting a different religion among believers. They can cause doubts in their beliefs and give rise to their beliefs.

Also, the highest peak of missionary activity is proselytizing and force a believer to abandon his own religion and force him to adopt another religion. It is essentially a part of missionary work. All of these are destructive goals aimed at destroying the peace of the country and destroying humanity. In fact, any healthy person understands that the concept of moderate Islam lies in the center of Islam, and following it will never lead to human misguidance.

If you pay close attention, the majority of those radicals who hold herself in front of the camera and say, "I apologize to my people and my president," were people who did not know religion at all. If you hear history, it will be the same way that you have been dropped in "hands" or money promising to receive religious knowledge. They seek radical Islam. The concept of gold meditation is so important. There is no need to go to the religion and not go deep in the religion. This was a warning for disagreements. At the end of the event, the students answered the questions.
