

Emotions on the visit the sculpture...

Remembering the memory of the ancestors, keeping up the noble cause, respecting the elderly, who today are in our ranks, who work in peace and prosperity have become an integral part of our spiritual life. This is the wisdom of the First President of the Republic of Uzbekistan, Islam Karimov, to say: "We are talking about remembering and remembering, first and foremost, the recognition of human beings and the perfection of humanity."

The students of the 107th group of the Hydromelioration faculty were in the Oksaroy Square on the square at the monument of the First President Islam Karimov, led by group director Sanobar Dustnazarova. In his vision of Islam Karimov, in his eyes, we understood that he was fond of his people as in life. We, young people, are the creators of the future who are promising to be worthy descendants of our great ancestors, to keep our glorious thoughts in our souls pure and immortal, and to serve them in the way of Independent Uzbekistan's happiness and great future is true.
