

A master class on a problematic topic

Collaboration with the students is very important for the future development of students for our institute. In connection with this, on December 6 of this year the teachers of the department of "Geodesy and Geoinformatics" of the faculty of Land Management together with the Uzbek State Institute of Land Management and Scientific Design organized a training seminar on "The importance of software in conducting land cadaster". The seminar attended by the 3rd and 4th course students of our faculty. Students received answers to their questions during this workshop.

Information by the teacher of the department "Geodesy and Geoinformatics" Utkir Islamov

Head of the Institute's Press Service Rakhimboy Djumaniyazov
