

## Winners of «Scopus Award - 2019» honor of scientists of the republic

In a society in which science and scholars are valued, there must be development and comprehensive development. There is no doubt that the contribution and role of the partner organizations to ensure this will be significant. Good work, such as placing articles in the Elsevier company, Scopus and Science Direct international database systems, is a development factor. The Scopus Award-2019 award Ceremony held yesterday at the Zarafshan Concert Hall by the Ministry of Higher and Secondary Special Education and Elsevier (The Netherlands). The event was attended by Deputy Prime Minister Aziz Abdukhakimov, heads of ministries and organizations, representatives of leading world rating agencies such as QS, Times Higher Education, specialists from Elsevier, foreign experts and rectors, vice rectors and doctoral students.

At the Scopus Award-2019 award ceremony; there were 37 scholars and researchers in 28 nominations, 6 higher education institutions and 1 academic journal, among them the most highly regarded institution and its scientists and educators. It is important to note that this educational purpose established within the national development program Science-2020 to include universities of the country in the ranking of the world's leading universities signed on March 23, 2018, by the Ministry of Higher and Secondary Special Education and Elsevier.

Based on the information posted on the website of the Ministry of Higher and Secondary Special Education of the Republic of Uzbekistan, it is worth noting the winners of the "Scopus Award - 2019" directly related to our institute. It is a great honor for our team to see the University of the Institute of Irrigation and Agricultural Mechanization Engineers ranked among the most prestigious universities in the category "Science Direct Top Published University", which is among the winners of the Scopus Award 2019. At the same time, our rector teachers are not proud of the academician of the Academy of Sciences of the Republic of Uzbekistan, Akil Umurzakov, for their contribution to the development of science. Hence, the quest for knowledge is truly spiritual courage. This shows that our future is bright. It is natural that an educational institution with a well-established educational and scientific-educational process will always welcome success. This will inspire and inspire our team to achieve even greater success.
