

Memorizing respected teacher Omanulla

☒ Normally, when it comes to education and upbringing, it discusses its quality and effectiveness directly. This is normal. Because the essence of education is to ensure the harmonious generation, the decisive force of tomorrow, to have a vast knowledge and intellectual potential for the benefit of our country. A trained person trains and teaches only what he / she is learning. This is the same truth. The reader, the students are not interested in knowledge, they are ridiculous, most of them can not master science, and we only deceive ourselves by asking questions. The speaker is a student or a knowledgeable educator. Who is the guilty person?

The linguistic meaning of the pedagogical word is that the child is brought up. You can follow a person who is interested and confident in his or her own words. It is a loving affair for the true teaching staff, the country, and the students. Let's think about this, for about 60 years, a mentor, candidate of philological sciences Omonulla Madayev, who has devoted her life to native language and literature education, comes to our minds. God has seen us a lot. The correct word, selfless, diligent teacher died at the age of 76. This was a real loss for the people of literature. In God's mercy, take over the teacher. We can not forget about an incident.

As a guest of the "Macro, talented, creative people" rally at the Institute of Irrigation and Agricultural Mechanization at the Institute of Irrigation and Agricultural Mechanization every Friday at the initiative of our rector Umurzakov Uktam Pardayevich, the participation of the teacher Omonulla Madayev has been marked for a long time by students, masters and professors. Those present at a spiritual event still ☒ tell each other their impressions. The teacher has repeatedly admitted that her language is the wealth and existence of the nation, that her love is related to the book's recitation. The purpose of the study was to express the sense of learning that the purpose of the study was, and that every word had its meanings, weight and smell, and that it was true that only those who had it had the taste. Examples of the fact that the word "master" is artificial, meaning that it is meaningless, the use of unintelligible words and phrases such as "conference", "snot", "lutfan offer" contradicts the language clarity, accuracy and accuracy.

Both the staff of the institute and the mentor Omonulla and the teacher were extremely pleased and satisfied with the creative dialogue.
