

Occupation is a treasure

On September 24, the current year, was organized a meeting with "Land management" faculty 1-2-3-4 course students of SD No.4. M. Mukhamedova, a psychologist of the institute, H. Eshova, the deputy dean for youth affairs of the faculty, and G. Abdulkaeva, an associate professor of the land use department participated at the event. The Deputy Dean for Youth Affairs H.Eshova opened the meeting and introduced the students the rules of SD. She informed the participants of the meeting that the girls' morality, ethics, aesthetics and cleanliness should be strictly observed in the SD.

According to the request of female students, the psychologist of the institute Muhayyo Kamolkhanovna Mukhamedova continued the round table discussion on the topic "The person with an occupation has gifted hands".

The reason for organizing this event was the last year's meeting on topic "If you have an occupation, you can earn a living" made a strong impression on female students.

The conversation focused on the fact that a person should have a goal as long as he/she lives, that someone can achieve their dreams through science, someone can achieve through occupation. Enlightenment and profession are important for the development of human society in every age.

The roundtable was full of lively questions and answers.

At the end there was promised to organize a circle to teach the craft of "Jewelry" in order to organize meaningful leisure time for female students.
