

KEYS TO RUNNING SUCCESSFUL RESEARCH

Goal: to share the experience of Susadica PhD students in conducting scientific research.

Audience: 4th year undergraduate students and 1st and 2nd year master

Nature of the seminar: interactive (presentation and discussion), language: English

What will participants learn in this seminar:

- Introduction to multi-disciplinary themes such as climate change modelling, experimental economics methods, and institutional analysis of water governance;
- Research process and steps.

Outline of the seminar

1. Finding research topic
2. Conducting effective literature review (e.g., matrix method) and Identifying research gap/problem
3. Developing theoretical and conceptual framework
4. Quantitative and Qualitative methods: data collection, regression analysis, text analysis
5. Research ethics

Requirements to participate in the seminar: motivation in doing research and knowledge of English language at intermediate level.

Moderator: Dr. Nozila Mukhamedova

Presenters: Daniela Peña-Guerrero, Zafar Kurbanov, Abdusame Tadjiev, and Davron Niyazmetov.

Time and Venue: Thursday, at 1:30 pm; TIIAME, B (V) - korpus, Lecture room 6
