

Evil of laziness

On April 18, a discussion was held at the 2nd Students' Residence. You saw a friend who accidentally smoked. You have come face-to-face with a teenager who is drinking alcohol. If you pass by in such a situation, you will become a sinner for the future ...

Medicine has already proven how much harmful tobacco and alcohol can cause harm to human organisms, especially to infected children.

Sometimes we see a child smoking cigarettes on the street. It can be concluded that if we stop and preach it, it can have a negative impact not only on our health but also on our neighbors.

When you see a child who smokes and smokes alcoholic beverages, do not be indifferent. Then you have to be careful about reprimanding this child and forsaking it back.

The school has been constantly exposed to the dangers of tobacco and spirits. However, this negative habit is still going on, but it is not enough to justify it.

Protecting the child against such harmful habits must be a separate approach to the formation of a specific "filter" in his heart. Then we train healthy children and contribute to the formation of a healthy society.

At home parents, teachers at the education institution, neighborhood neighbors find out what the child is doing, and many problems can be solved.

The child will not be a stranger. Every child growing up in our country is our child. His future prospects are important to all of us. Protecting our children from a variety of harmful habits is the human duty of every citizen to form a healthy lifestyle in the mind and love for sports.

Students of the AWEC Faculty have received detailed information about them.
