

Practical meetings on cooperation

On September 28, a meeting chaired by the President was held to discuss the effectiveness of reforms in the system of technical regulation, standardization, certification and metrology.

At the meeting, the issues of implementation of measures set by the President, further development of the industry, standardization in industrial enterprises, meeting the demand for qualified personnel in metrology and conformity assessment, as well as the development of science and education, especially in agriculture and water management, radical reform of the metrology and conformity assessment system is one of the priorities today.

In this regard, on October 14 this year, in cooperation with the Uzbek National Institute of Metrology under the Agency "Uzstandard" and the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, training of qualified personnel in the field of standardization, metrology, and conformity assessment of industrial enterprises. A meeting was held with the participation of the Vice-Rector and professors and teachers in order to facilitate the development.

The meeting at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers discussed the ongoing reforms at the university, the establishment of innovative laboratories in metrology and certification, as well as cooperation in the organization of "Metrology and Standardization, Certification" from the new academic year.

In order to increase the theoretical and practical knowledge of students at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, it is an important priority to create opportunities for students to apply their theoretical knowledge in practice by organizing practical classes directly at the Uzbek National Metrology Institute and its regional branches. was highlighted. During the meeting, officials of the National Institute of Metrology of Uzbekistan reviewed the work carried out by students of the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers in educational laboratories on the basis of innovative ideas.
