

A seminar on the organization of the "Electronic Department"

In 2020, the year of "Science, Enlightenment and the Digital Economy Development", the institute plans to gradually move to digital technologies in education and research. On February 24, Rector U. Umurzakov approved a "road map" for the transformation of five departments: Economics, E and MWR, Geodesy and Geoinformatics, Tractors and Automobiles, Eco GIS Center into an Electronic department. A seminar on the use of the program on forms.google.com was held on February 29 with the participation of vice-rectors, the head of the Central Election Commission and the heads of the responsible departments. In the seminar prof. A.Karimov gave a practical presentation on the software structure of forms.google.com, which allows teachers to work quickly with students, quickly learn the level of mastery of topics and improve the performance of students.

Google forms enable teachers and students to quickly process a variety of information in the form of text, tests, pictures, questions and answers, transfer data, tasks via telegram, email and other social networks.
