

Book is a cultural wonder

Notwithstanding the fact that attention is paid through the book, not only is it a sign of respect, but also the sharing of spirituality and enlightenment. The unique and effective method of enlightenment, which began with the suggestion of the President, is of great importance in the development of mass reader culture.

We go through book and we feed on our spiritual world. It is the tool of education and upbringing, the flag of humanity. This is a magic miracle book.

It is important to note that our people say, "Give salam forty days in a place where salt has tasted one day". It means to be respectful to the people and homeland you feed. Your murmur is the heart of your heart for the first time in your soul, and the respect of the educational institution and the coaching staff that has spoken in your community is always high. That is the school where the knowledge of sparks and the flames of knowledge can be burned in your heart.

It's fun to go to the school you are studying, and it's an important mechanism to share that education. Schoolchildren learn from you and try to be like you. This is the first impression you will have when they capture the book you have provided.

It's a pleasure and a good idea that the rectors of higher education institutions are in the process of public awareness of the spiritual necessity and the need to go to their own schools, to provide books and creative dialogues. .

The rector of the Institute, Professor Umurzakov Uktam Paradaevich, visited the general secondary school # 1 in Zaamin district of Jizzakh region. Stepping into an educational institution that has been filled with joy and admiration for an inferior childhood is an incredible experience. His study and aspirations in his youth age, his love to the book, once again stroketh in his heart. With his joy in heart, Uktam Umurzakovich, as soon as he stepped into the school where he had been trained, the teachers and students went to meet him. Then in the wide and bright hall of the school, with the participation of students and teachers a creative meeting with the teacher and the presentation of the best books were held.

It is difficult to imagine the joy of the pupils, who are pleased to receive more than fifty literary and scientific-publicistic books with joy and delight.

Sharing the book is going to continue as good as the moon is giving light and sunshine.

R.Jumaniyozov, the press secretary of the institute
