

Congratulations to first year undergraduates

A master's degree is the next step in the higher education system, which requires a certain amount of responsibility and commitment.

On October 16-17, 2020, an online meeting with 1st-year undergraduates was organized at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers. The moderator of the online event, held through the ZOOM platform, was the vice-rector for youth work Choriev Ruzimurat Kungratovich.

The opening remarks were made by the rector of TIAME, Doctor of Economics, Professor Umurzakov Uktam Pardaevich. He provided detailed information on the results of entrance examinations for master's degrees, scientific activity, and the organization of international master's programs. Then he introduced the members of the administration.

It should be noted that out of 858 who entered the magistracy this academic year, 183 people were admitted to the institute, that is, 1 out of 5 applicants in all specialties was admitted to the magistracy. It is noteworthy that 144 of 183 masters were graduates of our institute, and 39 were accepted from 22 other universities in the country. In the 2019-2020 academic year, 25 masters were prepared, and in the 2020-2021 academic year - 31 masters, including 3 masters in international specialties. At the same time, open new modern specialties were taken into account.

Uzbekistan has chosen the path of achieving sustainable development through the development of science. Since insufficient attention to scientific research, the lack of support for innovation hinders the development of many areas of the country. From the first days of his activity as head of state, President Shavkat Mirziyoyev pays great attention to supporting science, innovation, encouraging scientists.

The institute has created all the conditions for distance learning: for practical classes - the Moodle System distance learning platform, for listening to lectures, as well as participating in national and international conferences - the ZOOM program.

On October 14-15, 2019, at the QS in Conversation summit in Kaunas, Emerging Europe, and Central Asia (EECA) rating was announced. The Tashkent Institute of Irrigation and Agricultural Mechanization Engineers in the QS ranking criteria such as academic survey, employer assessment, and scientific potential, registered positive indicators among universities in Eastern Europe and Central Asia, ranked among universities in the interval between 301-350 places.

On April 22, the international rating agency Times Higher Education announced the results of the University Impact Ranking-2020. The Tashkent Institute of Irrigation and Agricultural Mechanization Engineers registered 201+ place in the overall ranking of world universities in the areas of "Clean water and sanitation", "Life on land".

TIAME is currently the only higher educational institution in the history of Uzbekistan, recognized by the largest rating agencies THE and QS.

In cooperation with TIAME and foreign universities such as Michigan State University, Mississippi State University, Wageningen University in the Netherlands, Slovak Agricultural University in Nitra, Masters are being trained on the basis of a joint educational program for the issuance of double degrees. To date, 24 of our masters have successfully completed the joint study program at Wageningen University in the Netherlands, and 2 masters this year at the Agricultural University of Nitra in Slovakia, receiving double

degrees.

We hope that in the future our masters will work in all spheres of society and will be of great benefit to society.

Press service of TIAME.
