

Prospective plans were agreed

It is noteworthy that at a dangerous time that worries the whole world, that is, in the difficult moments trying to fight against the COVID-19 coronavirus pandemic, our people are acting with solidarity and strong confidence on all fronts. Under the leadership of the President, experts in various fields, who are pursuing important decisions for the development of the country, are working on the future plans of tomorrow, fulfilling the important precautionary requirements of today.

In particular, with the support of the Embassy of Uzbekistan in Turkey with the participation of professors of the State Committee for Forestry of the Republic of Uzbekistan, Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, Turkey General Directorate of Forestry, Kastamonu University of Turkey organized online dialogues and talks. During the meeting, specific proposals were considered to develop cooperation between scientists of our countries in such areas as forestry, forest cadastre, to develop joint research projects on current issues in the field, to attract grants from the Ministry of Innovation Development of Uzbekistan and the Turkish Science and Technology Organization.

During the talks, the sides discussed the exchange of specialists and students in the field, the signing of "Mevlana" and "Erasmus +" programs between the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers and Tashkent State Agrarian University and Kastamonu University in Turkey. The possibility of establishing a joint faculty with Turkish universities in Uzbekistan was discussed. The parties agreed to organize a visit of representatives of Turkish universities to Uzbekistan after the end of the restrictions imposed by the international pandemic. It is clear that this cooperation will be rich in practical results.
