

Nargizakhon Khalikova Abduvalievna took the 1st place in the nomination "The best invention and the best utility model".

Winner of the republican contest "100 best innovative projects by women in Uzbekistan."

At the initiatives of the Ministry of Mahalla and Family Support of the Republic of Uzbekistan and the Center for Women Inventors the Republican competition "100 best innovative projects by women in Uzbekistan" was held. In order to provide comprehensive support in the implementation of innovative ideas, projects and developments by women in our country, increase the effectiveness of projects implemented by women working in science, education and various sectors of the economy.

Women scientists, teachers, inventors, engineers, designers, programmers, doctors, pharmacists, specialists, entrepreneurs and craftsmen, as well as talented students with their inventions, innovative ideas and projects attended this Republican contest. The competition was organized in 3 stages. More than 4,000 applications were received.

At the final stage of the competition, the documents and innovative projects of more than 300 participants who successfully passed the district and city (regional) stages were considered by the Republican Council of Experts, and their presentations were heard and widely discussed. Out of the projects, 100 most suitable projects and their authors were selected as the winners of the competition. ❌
