

Online dialogue on the organization of remote industrial practice for students of the Faculty of Land Management

Today, in the state unitary enterprise "Geoinformcadastr", within the framework of a cooperation agreement with TIAME an online dialogue took place through the ZOOM platform on the organization of remote industrial practice for students of the Faculty of Land Management. The director of the state unitary enterprise "Geoinformcadastr" Sh.Mayinov, chief engineer M.Abdurakhimov, dean of the faculty Sh.Narbaev, head of the department of land use A. Babazhanov, head of practice Z. Khafizova, as well as 3rd-year students of the Faculty of Land Management, took part in the online dialogue. resources.

The dean of the faculty Sh. Narbaev introduced the students to the procedure for organizing remote industrial practice during the quarantine period announced in our country from July 10 to August 1. Then an online dialogue took place with A.Bobozhonov and Z. Khafizova. They exchanged views on the effective conduct of industrial practice for students and provided information on the organization of industrial practice in the form of electronic exchange of information, on the conduct of online classes and video lessons by specialists. Students asked questions and received the necessary information for themselves.
