

Spanish delegation visit

The result of direct co-operation in the field of any development lies in the result of the consultation.

This is also evidenced by the visit of the Spanish delegation to the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers.

On May 8, 2019, the Vice-Rector for International Cooperation at Castilla La Mancha University (UCLM), Professor Fatima Guadamillas Gomes, HR Director Yordi Kimeno (Jordi Gimeno Bevia) and ALEX-YASIN "Said Alexander Petrov, director of the environmental organization, in the process of identifying future plans.

During the visit, foreign specialists were interested in the integration of the practical and theoretical process, entering the sights of our institute, audiences and laboratories. Then our rector, Professor O ' . Umurzakov signed a Memorandum of Understanding with the University of Castilla-La Mancha (UCLM).

At our institute, we also witnessed the consistent implementation of cooperation with foreign educational institutions. Recognizing the establishment of an international master's education system with foreign educational institutions, the rector also informed about the recent establishment of the International Doctorate in Central Asia.

It is no coincidence that foreign experts started their visit to Samarkand. During the Amir Temur period in the 15th century, they read about Rui Gonzalez de Clavijo, who became Ambassador to Amir Temur in 1404 in the name of King Henry III of Spain, Trastamara of Spain, in the beginning of the fifteenth century, visiting places of interest of the Ambassador of Spain said that they had been abducted.

The clavicle was amazed at the many gardens surrounding Samarkand by Amir Temur: In the book "Samarkand Tour of the Amir Temur's Palace," the book says: "There are so many gardens and vineyards around the city, In the center of the city, the tall trees are as close to a forest as they are growing, in some places they are just a few laps (5-10 km) away. " The Spanish traveler also wrote that Amir Temur built special vineyards in large areas and spent a lot of time in towns and gardens.

The first visit of Spanish experts to our country was a source of joy. It is also appropriate to provide brief information about the university they are currently studying.

The University of Castilla La Mancha (UCLM) (Universidad de Castilla La Mancha) is the Spanish state university. According to the international rating, the university is in the list of the top 1000 universities in the world. The University was founded in 1982 in the Castile La Mancha Autonomous Region of Spain.

The University has branches in Albasete, Cuenca, Ciudad Real and Toledo.

Currently, more than 30,000 students are studying at the university and 2,300 professors are working. At the University's bachelor's degree you can study in 50 directions, in magistracy more than 100 specialties, and in doctoral studies in all fields of science.

One of the main directions of the University is fundamental research. There are 35 scientific research centers and institutes in the university. Regional Development Institute and Castile La Mancha Science Park.

The ALEX-YASIN ecological organization fully covers the financial expenses of the Spanish delegation. Alexandra Pastrana, proud to admit that Spain occupies the first place in the world for the treatment of sewage treatment, emphasizes the advantage of mutual benefit from the broader set of cooperation

opportunities with Uzbekistan.

In conclusion, the delegation held extensive negotiations. Also, all faculties' laboratories and scientific potential were demonstrated to them. In the course of the negotiations, the delegation had agreed on further cooperation with the delegates.

The press secretary of the Institute, Rakhimboy Jumaniyazov
