

Students at festivals in Tashkent

On February 8-15, 2020, activists of the Institute's Youth Union took part in festivals organized in Tashkent. Members of the youth council and active students of the Faculty "Agricultural Mechanization" visited the State Academic Big Opera and Ballet Theater of Uzbekistan named after Alisher Navoi, watching the play "Sky of My Love" ("Sevgim Samosi") by M. Bafoev. The opera based on a genuine historical plot that tells us about the personal life and scientific work of one of the great scientists of the East - Ahmad al Fergani. His life as scales - on one side of the scale brilliant scientific discoveries and extraordinary abilities, and on the other - doomed to misfortune love for the young beauty Safina. Everyone really liked the performance. Students became more familiar with the life and work of our great-grandfather (full name Abul Abbas Ahmad bin Muhammad ibn Qasir al-Fergani) and received the necessary skills and positive conclusions.
