

## Let's take an active part in the "Earth treasure - the priceless wealth of the land" events!

At a time when coronavirus infection is spreading around the world, President Shavkat Mirziyoyev is supporting us, the youth. In particular, in his address to the nation, the head of our state said, "I would like to appeal to our students and pupils studying at home today: Dear children, do not waste your time at home! Study online lessons diligently. Read a book, increase your knowledge, do not miss a single day of physical training and exercise. "

This call inspired all young people to study and research, not to give in to despair, but to great power and inspiration. Our President asks us to increase initiative, solidarity, confidence in the future, to strive and learn, to work, to set an example for young people and learn life skills from adults.

It is no secret that food security has become one of the most pressing issues facing the world today. Therefore, on April 8, the head of state called on the population to use their land effectively in a video conference dedicated to the analysis of the effectiveness of work in the fight against the coronavirus pandemic and the development of horticulture, which is an important source of food security, employment and income.

### **Dear peers, dear young people!**

So, let's master online lessons and actively support the planting of fruits and vegetables in our family's garden in the village where we live, strictly following the rules of quarantine! In this way, first of all, we contribute to the well-being of our families, our people, and in turn, increase our physical fitness and activity. We will also be able to put into practice the lessons learned from teachers and conduct regular online consultations. In this process, as a future representative of the intelligentsia, let's contribute to familiarizing the population with the benefits and preferences introduced by our country in the cultivation and cultivation of horticultural crops.

In short, let each of us become an example by actively participating in the "Land is a treasure - a priceless treasure of the land." Based on the current situation, let's stand in front of our parents, raise the level of organization and effective use of work on the farm, set a personal example, be active. Of course, let's unite with the motto "Healthy body - healthy mind" and show our commitment to the ideas of our President. Especially in this process, students of higher education institutions in the field of agriculture and water management should be proactive and at the forefront. Dear friends, once again we wish you all good health. We hope that these difficult days in our country will end soon and that we will be able to stay at home and overcome the difficulties with patience. We ask you to be more responsible and active in the socio-economic life of the country.
